# Revamp a Resource Planning Tool for Film Students

This project needed a modern update for the software used by film students.

I created a design system and supported with managing and planning developer sprints.

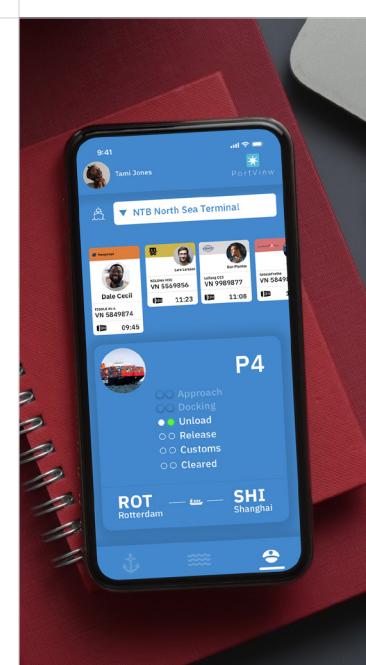

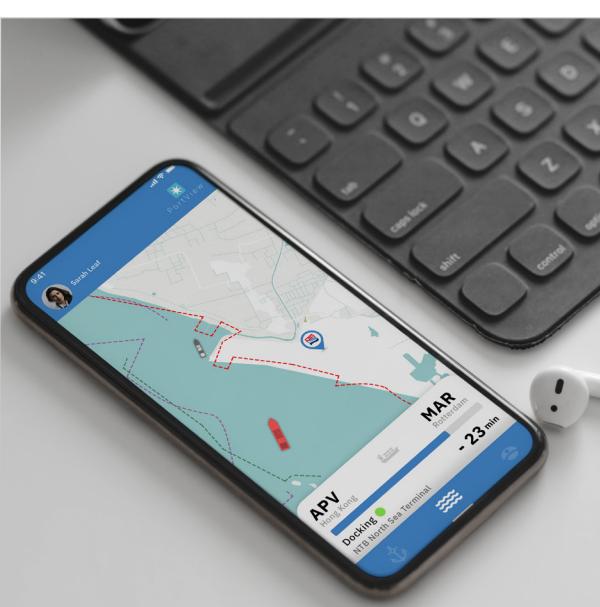

## Mobile Application for Port Agents

Maersk shipping needed to update and convert a desktop - built software into a mobile application.

I was hired to support in crafting user interfaces, and designing a component system for scaling to respond to multiple users and languages.

Revamping a B2B Vehicle sharing and management application: VAN2SHARE for Berlkönig

Mercedes-Benz

## Van Fleet Dashboard

For both projects, I led the product and the service design efforts, with stakeholder management, design system governance, and user research.

\*NDA restricted

## Prototyping a Trunk Parcel Delivery Service

During my time at smart AG, I got to work on their endeavour to build its (back then) sister company Mercedes Benz, a prototype for an in-car-delivery service.

UI, prototyping, collaborating with 3rd party development teams were my main tasks.
